Copying from the Bypass Tray

Use the bypass tray to copy onto special paper (OHP transparencies, label paper, adhesive labels), thick paper (postcards and thin paper), and copy paper that cannot be loaded in the paper trays.

Preparation

When copying from the bypass tray, select [1 Sided→ 1 Sided] for copying in [Dup./Combine/Series]. You can change the initial settings. ⇒ p.99 "Duplex Mode Priority"

#Important

- When paper larger than 433 mm in size is used, it may become wrinkled, may feed into the machine, or may cause jams.
- □ When copying onto special paper, such as adhesive labels, be sure to select "Face up" in ⇒ p.108 "Eject Copy Face Up/Down in Bypass Mode". If you select "Face Down", a paper misfeed may occur.

Note

☐ The sizes of paper you can use with the bypass tray are as follows.

Metric version	 Vertical: 100 – 305 mm Horizontal: 139.7 – 600 mm
Inch version	 Vertical: 3.9" – 12.0" Horizontal: 5.5" – 23.6"

☐ The machine can automatically detect the following sizes as standard size copy paper.

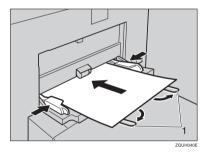

Metric	A3D, A4D, A5D, 100 × 148
version	mm
Inch version	A3\(\mathbf{D}\), 11"\times 17"\(\mathbf{D}\), 8\(^1/_2\)"\times 14"\(\mathbf{D}\), 5\(^1/_2\)"\times 8\(^1/_2\)"\(\mathbf{D}\), 100\times 148\times mm

- ☐ If you want to use the size of paper other than ones in the above table, be sure to specify the size. ⇒ p.23 "When copying onto standard size paper", ⇒ p.79 "Program"
- □ When copying on OHP transparencies or paper heavier than 105 g/m² (about 27.9 lb.), you need to specify the paper type. ⇒"Paper Type"in the General Settings Guide
- ☐ If you want copies to be delivered face down when placing originals on the exposure glass, select "Face down" for both "Eject Copy Face Up/Down in Glass Mode" and "Eject Copy Face Up/Down in Bypass Mode" of User Tools.
- ☐ If you have selected OHP transparencies or thick paper paper in "Special paper", you cannot have copies delivered face down.
- If you use label paper, you cannot have copies to be delivered face down.
- ☐ If you use paper larger than 432 mm, 17" in size, you cannot make copies to be delivered face down.
- ☐ The maximum number of sheets you can load into the bypass tray depends on paper type. The number should not exceed the upper limit.

1 Open the bypass tray.

Insert copy paper with the side you want to copy facing up, pusing until you hear the beep, and then align the paper guide to the paper size.

1. Extender

Ø Note

- ☐ If the guides are not flush against the paper, images might be skewed or misfeeds might occur.
- ☐ Do not stack paper over the limit mark, otherwise images might be skewed or paper misfeeds might occur.
- ☐ Swing out the extender to support paper sizes larger than $A4\Box_{r} 8^{1}/_{2}" \times 11"\Box_{r}$.
- Fan paper to get air between the sheets and avoid multi-sheet feed.

Staple

The following types of paper cannot be stapled:

- Postcards
- Translucent paper
- OHP transparencies
- Label paper (adhesive labels)
- Thick paper
- Thin paper
- Curled paper
- Paper of low stiffness
- Paper of mixed sizes (Differing horizontal dimensions, such as A4 □ and A3 □)

In the following cases, the copies will be delivered to the shift tray without stapling:

- When the number of sheets for one set is above stapler capacity.
- When memory reaches 0% during copying.
- When using Double copies, or "1 Sided → 1 Sided", "1 Sided → 2 Sided", "2 Sided → 1 Sided" or "2 Sided → 2 Sided" in Combine mode, select □ original for □ copy and □ original for □ copy.
- When using Double copies, or "1 Sided 2 Pages→1 Sided Combine" and "1 Sided 4 Pages→2 Sided Combine" in Combine mode, select □ original for □ copy and □ original for □ copy.

- When using "Left 2" or "Top 2" with Double copies, or "1 Sided → 1 Sided", "1 Sided → 2 Sided", "2 Sided → 1 Sided", or "2 Sided → 2 Sided" in Combine mode, select original for copy and originals for copy.
- If you use the Auto Paper Select function in the Mixed Size mode, the machine selects the proper size of paper and staples it even if you place different sizes of originals. Set the size of paper you want to use in the paper tray beforehand. The sizes of the paper you can staple in the Mixed Size mode are as follows.
 - A3□ and A4 □
 - B4 □ and B5 □
 - $11'' \times 17'' \square$ and Letter $(8''^1/_2 \times 11'') \square$

The sizes and orientations of the paper you can staple and the stapler capacity are as follows.

You cannot change the stapling positions during copying.

When the original image is rotated, the stapling direction turns by 90°.

When "Top" or "Bottom" is selected and the paper with the same orientation as the original is not loaded, the image is rotated and the paper with the same size and the different orientation is selected.

With certain stapling settings, you cannot use the Rotate function.

When "Saddle Stitch" is selected, the copies are stapled with the saddle stitch stapler, folded in half and then delivered.

When "Saddle Stitch" is selected with the "Magazine" function, the copies are stapled with the saddle stitch stapler, folded like a magazine and then delivered.

Punch

- With certain Punch function settings, the Rotate function cannot be used.
- Since punch holes are made in each copy, positions vary slightly.
- Punchable paper sizes are as follows:

Duplex

You cannot use the following copy paper with this function:

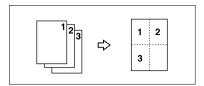

- Paper smaller than A5, $5^1/2^{"} \times 8^1/2^{"}$
- Paper thicker than 127.9 g/m², 34 lb.
- Paper thinner than 64 g/m^2 , 17 lb.
- Translucent paper
- Label paper (adhesive labels)
- OHP transparencies
- Postcards

When an odd number of originals is set in the optional document feeder, the back of the last page is blank. During copying, the image is shifted to allow for the binding margin. The image quality of the front and back of copies might be different.

Combine

- If the calculated ratio is under the minimum ratio, it is adjusted to within available range automatically. However, with some ratios, parts of the image might not be copied.
- You cannot use custom size paper.
- In this mode, the machine selects the ratio automatically. This ratio depends on copy paper size and the number of originals.
- The reproduction ratios you can specify are 25 400%.
- If the direction of originals is different from that of the copy paper, the machine will automatically rotate the image by 90° to make copies properly.

• If the number of originals placed is less than the number specified for combining, the last page is left blank, as shown in the illustration.

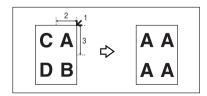

Copying Book Originals

- The machine sets the reproduction ratio automatically to meet paper size and copies originals together onto the paper.
- The machine uses ratios in the range of 25 to 400%
- If the calculated ratio is under the available minimum, it will be adjusted to minimum ratio. However, with some ratios, parts of the image might not be copied.
- Even if the direction of originals is different from that of the copy paper, the machine will automatically rotate the image by 90° to make copies properly.
- If you mix originals of different sizes or place originals in different orientations, you cannot use this function.
- Four originals are copied onto each sheet of copy paper with this function. If the number of originals scanned is less than a multiple of 4, the last page will be blank.
- Copying to make a magazine may take some time after scanning originals.
- If the Booklet Finisher is installed and you select "Magazine" and "Staple (Saddle Stitch)", copies are stacked, stapled at the center, folded in half automatically, and then delivered.

Repeat

Depending on paper size, ratio, and orientation, parts of repeated images may not be copied.

• If you use this function with "Custom Size Original", you can copy repeatedly the image in the area you want by specifying the vertical and horizontal lengths from the base point. In this case, place your original on the exposure glass. ⇒ p.16 "Placing Custom Size Originals"

- 1. Base point
- 3. Vertical length

Centering

Although the original is set at a different orientation to the paper, the machine will not rotate the image by 90° (Rotate copy).

Erase

The width of the erased margin varies depending on the reproduction ratio. If the size of the original is different to sizes listed in the following chart, the erased margin might be shifted.

Metric version

Where Original Is Set	Paper Size and Orientation	
Exposure glass	A3D, B4D, A4DD, B5DD, A5D, 8 ¹ / ₂ "×14"D, 8 ¹ / ₂ "×13"D	
Document feeder	A3□, B4□, A4□□, B5□□, A5□□, 8¹/2"×13"□	

Inch version

Where Original Is Set	Paper Size and Orientation
Exposure glass	$\begin{array}{c} 11"\times17" \square, 8^1/_2"\times14" \square, 8^1/_2"\times11" \square \square, 10"\times \\ 14" \square, 8"\times10" \square \end{array}$
Document feeder	$\begin{array}{c} 11"\times17"\square,8^{1}/_{2}"\times14"\square,8^{1}/_{2}"\times11"\square\square,10"\times\\ 14"\square,5^{1}/_{2}"\times8^{1}/_{2}"\square\end{array}$

You can erase two parts using "Erase Inside 1" together with "Erase Inside 2"

Margin Adjustment

If you set a binding margin too wide, part of the image may not be copied. When making copies in Combine mode, the binding margin is added to copies after the combination is finished.

Background Numbering

If the numbers overlap the copied image, the parts overlapped may look like some pattern.

Preset Stamp

You can change the size and density of the stamp with User Tools.

Depending on paper size, if you change the stamp size, parts of the stamp might not be printed.

When you use this function with the Magazine or Booklet function, you can print the stamp only on the first page.

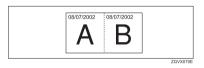

O

Date Stamp

• When using Combine mode, the date stamp is printed as follows:

 When using Magazine or Booklet function, the date stamp is printed as follows:

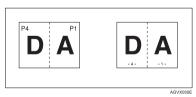

Page Numbering

When page numbering is used with Combine mode, page numbers are printed as follows:

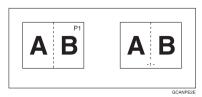

Page Numbering per original:
 Combined with 1 Sided/2 Sided in the Combine function

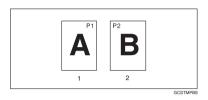

Combined with Magazine or Booklet function

• Page Numbering per copy: Combined with 1 Sided/2 Sided in the Combine function

If you combine this function with the Duplex (Top to Top) function and select the "P1, P2" or "1/n, 2/n" format, the page numbers on the back of are printed as follows:

- 1. Front
- 2. Back

Front Cover, Front/Back Cover

- In "Cover Sheet Tray" of User Tools (System Settings), if you selected "At Mode Selected" for "Display Time", the machine refers to the settings in "Cover Sheet Tray" to ascertain whether the front and back covers are copied 1-sided or 2-sided. If you selected "Full Time" for "Display Time", the machine refers to the settings in "Paper Type" to ascertain whether the front and back covers are copied 1-sided or 2-sided. ⇒ "Paper Type" and "Cover Sheet Tray" in the General Settings Guide
- If Blank mode is selected, the cover is not counted as a copy.

Designate

When "Combine (1 Sided→2 Sided)" has been selected, specified pages will always be copied on the front of copies in the same way as in Chapters mode.

Slip Sheets

When not copying onto slip sheets, the sheets are not counted as copies.
